CERTIFICATES

Certificate of Training from Null Class (08/2023 - 09/2023)
successfully completed an online training program on web development on "Learn to build a real-time website like Stack Overflow" using MERN stack.

PERSONAL PROJECTS

Project 1: Hotel Booking Website
- Developed a fully responsive hotel booking website.
- Implemented Redux Toolkit for state management. Established seamless data communication between the backend and frontend through Axios.
- Engineered a robust backend system with Express.js and Node.js, proficiently handling API requests and database interactions. Integrated MongoDB Atlas to efficiently store and manage hotel room details
- View the live application at: https://hotel-booking-personal-project-1.vercel.app/

Project 2: ECommerce Website
- Developed a fully responsive MERN Stack ECommerce Web Application. Utilized React Context API for efficient state management. Implemented robust user authentication through JSON Web Tokens (JWT).
- Engineered registration and login forms with validation. Designed and implemented a dynamic product catalog, allowing users to filter products by category and price range.
- Established a fully functional shopping cart system, enabling users to effortlessly add, remove, and update product quantities. Implemented wishlist functionality for users to save desired products.
